

Live freeze-dried vaccine,  
Winterfield 2512 strain

For the active immunization of  
chickens against Infectious Bursal Disease

### ► COMPOSITION

**CEVAC® IBD L** contains the Winterfield 2512 strain of Infectious Bursal Disease virus in live, freeze dried form. The embryonated hen eggs used in the production of the vaccine are obtained from specified-pathogen-free (SPF) flocks.

### ► INDICATIONS

For the active immunization of healthy chickens against the disease caused by classical and very virulent strains of Infectious Bursal Disease (Gumboro Disease).

### ► ADMINISTRATION AND DOSAGE

**CEVAC® IBD L** must be administered **by drinking water method**.

Broilers should be vaccinated with **CEVAC® IBD L** from 10 to 18 days of age, depending on the level of maternally derived antibodies.

The exact date of vaccination can be determined by checking the level of antibodies by serological methods.

### ► STORAGE

- Store vaccine between +2°C and +8°C or 35°F and 45°F
- Protect from light

### ► PACKAGED

- 1,000 - 2,500 and 5,000 dose vials
- 20 x 1,000 dose vials / box
- 20 x 2,500 dose vials / box
- 20 x 5,000 dose vials / box
