

## Live frozen vaccine

For *in ovo* and subcutaneous administration  
Marek's Disease Live Virus, Serotype 3.  
For the active immunization of chickens  
against Marek's Disease

## ► COMPOSITION

**CEVAC® MD HVT** is a live virus vaccine containing serotype 3 (HVT) Marek's Disease virus. This Marek's Disease vaccine is presented in a frozen cell associated form.

## ► INDICATIONS

**CEVAC® MD HVT** is recommended for use in 18 to 19-day-old embryonated chicken eggs and in healthy one-day-old chicks as an aid in the prevention of Marek's Disease.

## ► ADMINISTRATION AND DOSAGE

Prior to use, the vaccine must be thawed and diluted appropriately with the sterile vaccine diluent as stated in the package insert. Immediately use the vaccine and mix occasionally to ensure uniform suspension of cells.

**For *in ovo* administration**, embryos are inoculated with one full dose of vaccine (0.05 ml or 0.1 ml)

**For day-old vaccination**, one-day-old chicks are subcutaneously vaccinated with 0.2 ml of vaccine in the back of the neck.

## ► STORAGE

Store this vaccine in liquid nitrogen.

## ► PACKAGED

1,000 dose; 2,000 dose;  
4,000 dose ampules

**CEVAC® MD HVT  
also can  
be administered  
in combination  
with a SB-1**
